

# Cushy CMS - Free and simple CMS!

Contributed by

January 2009

CushyCMS ([www.cushycms.com](http://www.cushycms.com)) is a Content Management Systems (CMS) that is truly simple and also happens to be free!

It's built from the ground up with ease of use in mind - for both content editors and designers. It's such a simple CMS that it takes less than 3 minutes for a web designer to implement. No PHP or ASP required for this CMS. If you can add CSS classes to HTML tags then you can implement CushyCMS. It's also a hosted CMS, so no installation or maintenance is needed either.

View the how-to movie at:

<http://www.cushycms.com>

Content editors will love managing their content with this system. No training required, it's just that easy.

And it is, and always will be a free CMS.

Web Designers:

Allow clients to safely edit content

No software to install, no programming required

Takes just a few minutes to setup

Produces standards compliant, search engine friendly content

Define exactly which parts of the page can be changed

Content Editors:

Super

Easy To Use!

Its versatile...

You define what's editable and Cushy will take care of the rest. Automagically handling text, html and images.

Its fast...

Define editable areas of your pages with a few css classes, provide FTP details then you're done!

Its easy...

No programming required and no server requirements. No training required for users.

Its Free...

Unlimited free usage!
